MEMORANDUM FOR: Assistant for Plans and Development, PDS

THRU : Chief, Production Services Division, NPIC *mb*

SUBJECT : Proposed PAR's -- Nos. 230 and 231, 10x Color
Lens and Color Lamphouse for 10-20-40 Enlarger.

1. Though it is extremely difficult to foresee future requirements, there does not seem to be adequate demand now for the type of work this lens would accomplish.

2. This lens is limited to a 10x magnification factor, to date we have seen very little, if any, film that could stand 10x magnification and produce a print that the P.I. can use.

3. We understand that the "Briefing Board" enlarger will have a color capability.

4. The lens is just too limited for the money.
